OUR CLAIM

Leading the way in Europe

VOGEL & NOOT is Europe's leading technology partner that sets technical standards and its broad product portfolio in the fields of radiators, underfloor heating and chimney systems.

Through permanent innovation in the field of energy efficiency and unique design concepts, the products from **VOGEL & NOOT** inspire planners and heating contractors as well as users of the heated rooms.

This is what **VOGEL&NOOT** stands for

EnergyEfficiency

As a pioneer in innovation, **VOGEL & NOOT** offers forward-looking heat release technology for thermal comfort in harmony with climate protection

Trendy Heat Design

The Versatile design radiators from **VOGEL & NOOT** set the tone as an individually customizable warmth furniture with their unique surface concept in modern living spaces.

Integral Assortment & Service

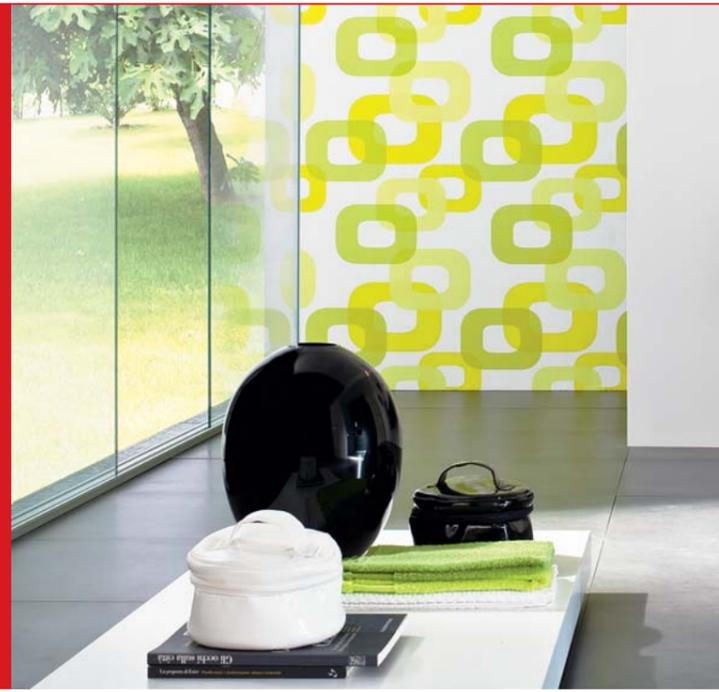

VOGEL & NOOT not only guarantees a high-quality product range for optimum heat-dissipation solutions, but also for the best consulting expertise and outstanding service.

heatingthroughinnovation.

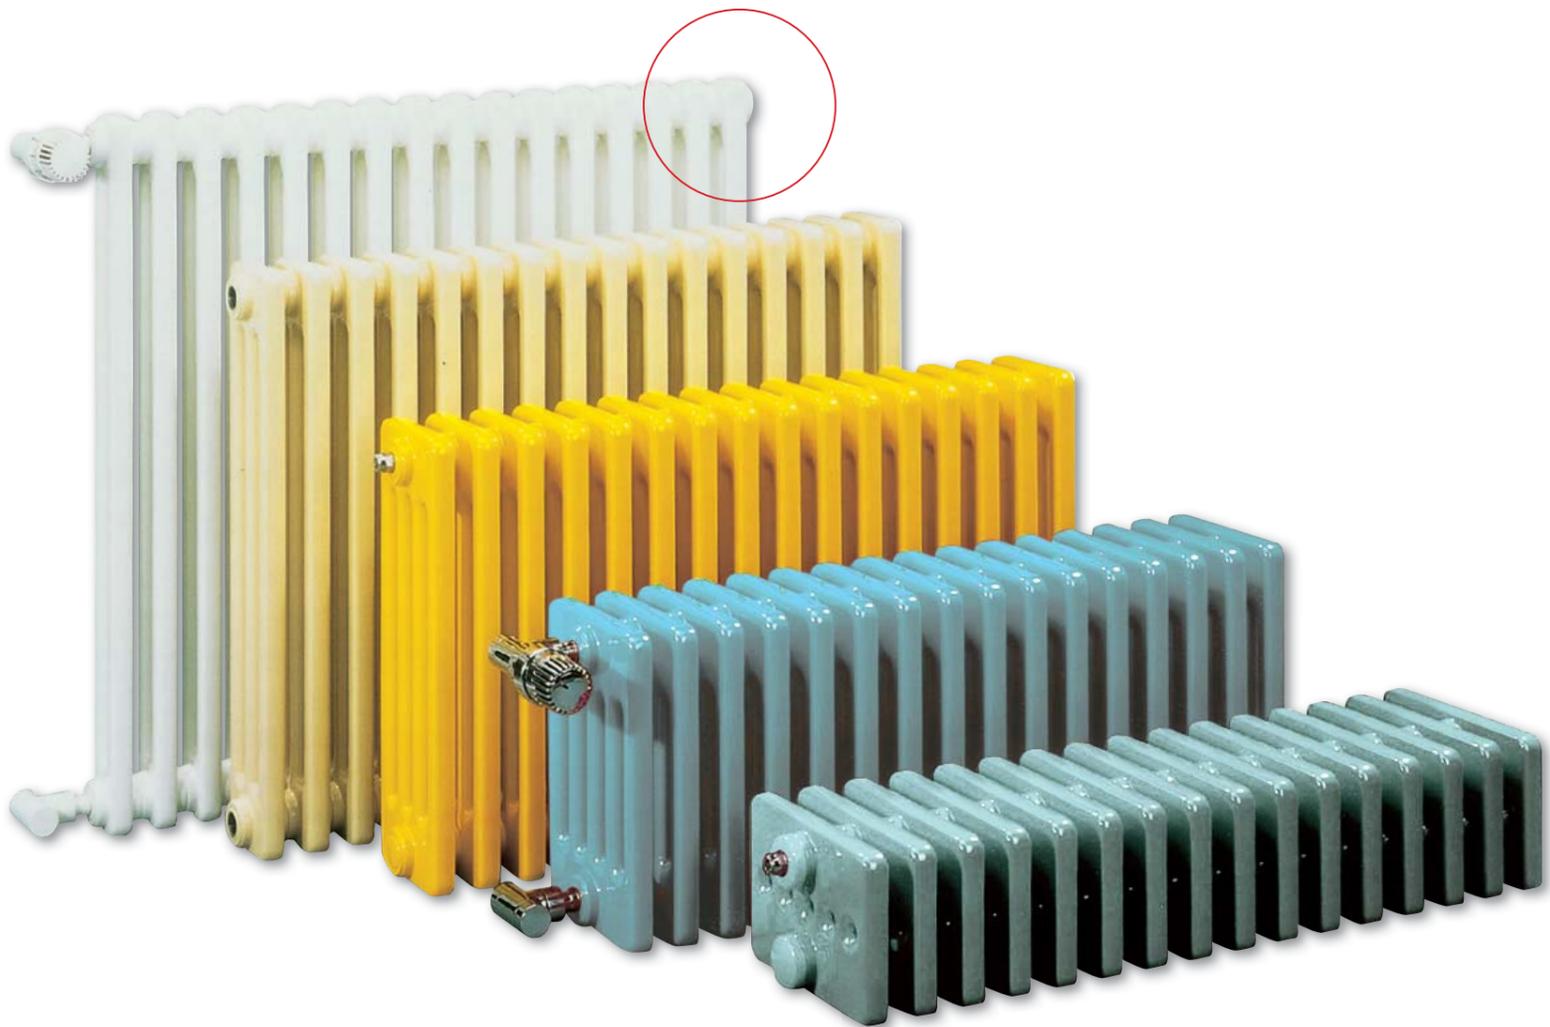

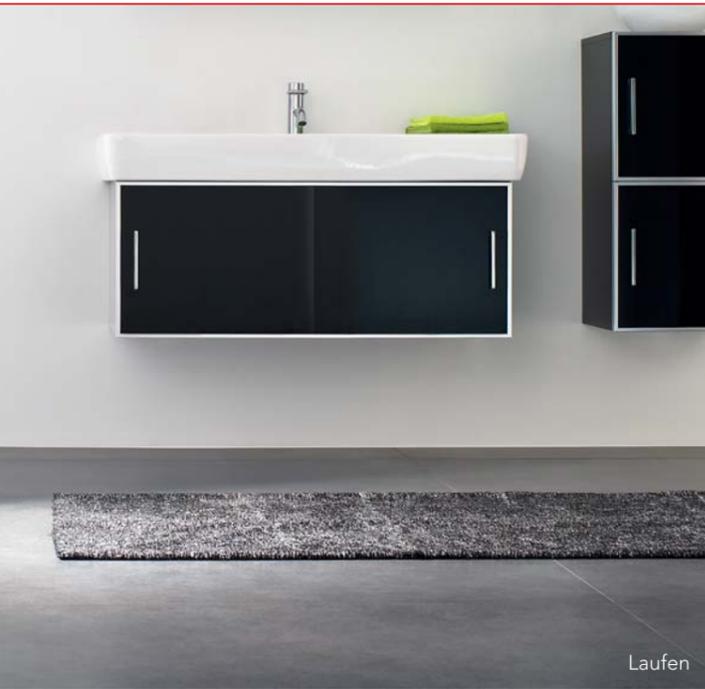

LASERLINE
STANDARD.

Your Advantage:

The model is available in 5 depths and 26 heights, with 4 to 50 members and in all RAL, sanitary and metallic colors.

The Laserline Standard model is a tube radiator in the classic style. He convinces in the standard or valve design by its simple, straightforward design, which provides a masterful variety mainly through the great variety of colors, sizes, limbs and columns.

Standard Connection

Central Valve Connection

Specifications in mm.

LASERLINE
TWIN.

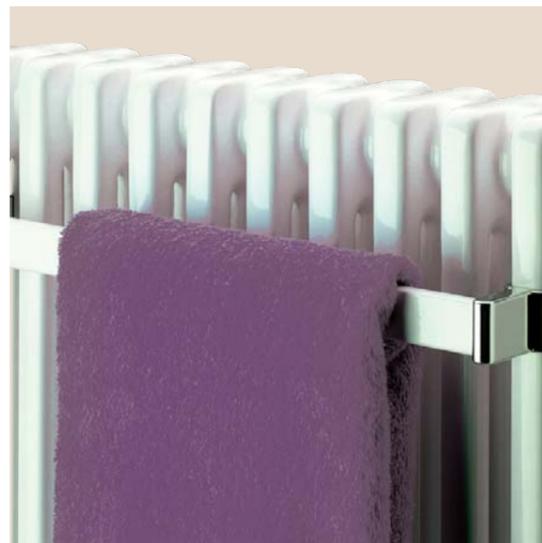

Your Advantage:
The twin model includes a standard towel rail with welded attachment as well as the matching wall mounting.

Simple linearity in the classic style is also described by the model Laserline Twin, in the standard or valve version. The generous areas are ideal because of their two-column construction even in rooms with less space requirement.

Twin with standard towel rail.

| Limbs | 10 | 12 | 10 | 12 | 10 | 12 | 10 | 12 |

Specifications in mm.

Your Advantage:

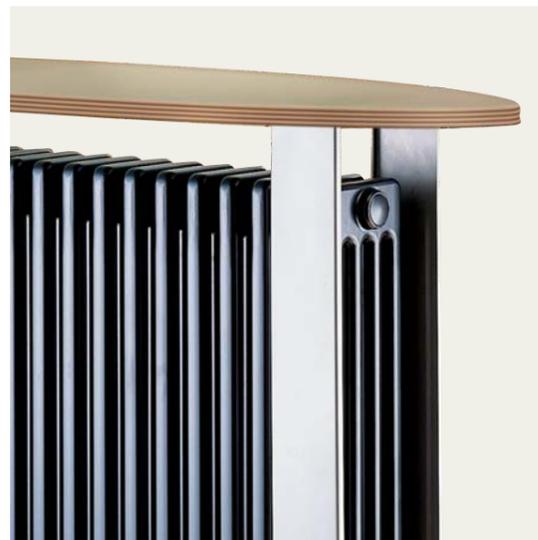

State-of-the-art heating technology, innovative design and practical storage options are combined in the Architecture model.

LASERLINE
ARCHITECTURE.

The fact that radiators not only provide heat but also combine design and function is demonstrated by the model Laserline Architecture in the standard or valve version. It is modern tube radiator as well as bench and counter in one.

Architecture Bench
