OUR MISSION.

Pointing the way forward in Europe

VOGEL&NOOT is Europe's leading technology and design partner, setting the technical standards and design trends. The broad product portfolio of the brand comprises the areas radiators, underfloor heating and chimney systems.

Architects, planners and lovers of fine design are all filled with enthusiasm by the sheer beauty **VOGEL&NOOT** brings for users of heated rooms by with permanent innovative power achieved in energy efficiency and the unique design concepts of their products.

Numerous seals of quality and the brand name **VOGEL&NOOT** guarantee the excellence and manufacturing quality of our products.

VOGEL&NOOT stands for

Trend setting design in heating solutions

The extraordinary variety of design radiators from **VOGEL&NOOT** brings perfection to all aspects of modern living space with individual fittings for heating and unique surface concepts.

Highest energy efficiency

The innovation pioneer **VOGEL&NOOT** offers advanced future-oriented heat emission technology for thermal comfort in perfect harmony with climate protection.

Integral range & service concept

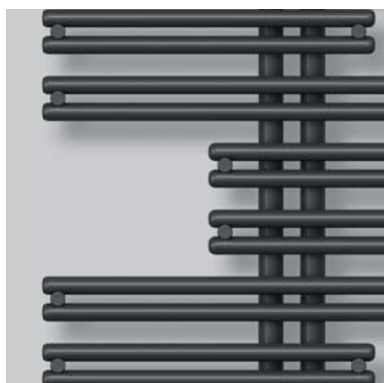

VOGEL&NOOT as a complete provider not only guarantees a product range of the highest quality for optimal heat emission solutions, but also provides the best advisory skills in consulting plus an exceptional service standard.

heatingthroughinnovation.

MASTELLA DESIGN furniture

Variety in every single area

VOGEL&NOOT with its future-oriented design radiators, trend setting bathroom radiators, convectors and flat-tube radiators in highly attractive designs, plus energy efficient flat and modern refurbishment radiators is the complete provider on the European core markets.

The combination of innovative heat emission-technology and trend-setting design concepts is what makes **VOGEL&NOOT** products the first choice solutions wherever aesthetic demands are of the highest.

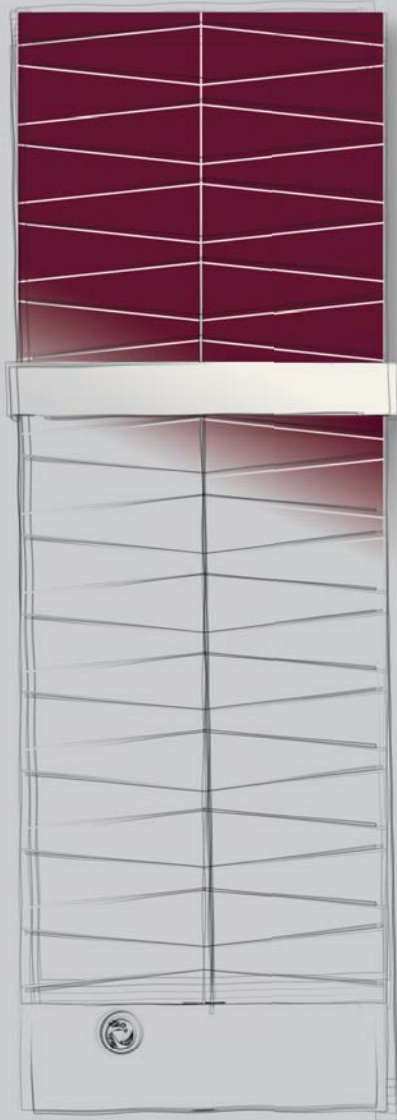

A feeling for design

VOGEL&NOOT stands for the highest standards with all its products plus a remarkable sensibility to the finest design details and all special features. One example here is that the tube ends of all round tube models are not simply welded, but are rubbed in a special process to give an effect of unique optical appeal coupled with outstanding technical quality.

This unmistakable instinct for quality and providing the best solution for each individual requirement is reflected in all the products and it is the factor that has made **VOGEL&NOOT** the premium provider.

DESIGN COMPETENCE.

From a sketch to a design sculpture.

Designed by Manfred Lechner.

Individual design

The unique surfaces concept from **VOGEL&NOOT** offers over a thousand possibilities for structuring your own design radiators as you please. The cooperation between top designers and international experts such as Harry Gatterer from the Matthias Horx Zukunftsinstitut is one factor behind the **VOGEL&NOOT** success in setting new trends for living space design.

The inviting formal expression of the design radiator models SEWA and NERO offers a truly distinguished selection of the most fashionable architecture and floral patterns in all colours. The modern high-gloss appearance of the front surfaces is emblematic for the most exquisite design for living and residential culture. The own designed radiators are a delightful focus of attention in the reduced living spaces of the present – an exciting work of art has been created!

Constant ideas generation, creating the future

With its two research and development centres in Austria and Finland, and its own Design & Innovation Centre, **VOGEL&NOOT** is permanently working on things to come and developing the radiators of the future – in both technical and design terms.

BAWA-VM SPA

FATALA-VM SPA

The new SPA models from the **VOGEL&NOOT** design radiators collection are not only a joy to the eye of all who see them, but the soft lines and corners are a positive invitation to the sense of touch. The finest in fashionable design for heating, raised incisively from the wall and with all the valve and fixture units kept completely out of sight.

BAWA-VM SPA.

A design radiator with centre-connection-radiator technology is equally a part of any SPA wellness experience with the bath, the shower and the washstand. The gentle softline frames combined with the attractive centre-connection screen are styles and style elements of the highest design competence.

Radiators:

Radiators and softline panels:
RAL 6019 pastel green

Radiators: RAL 9016 traffic white
Softline panels: RAL 7037 dusty grey

Your advantages: easy to clean vertical screens are inviting to the senses and the touch. The **BAWA-VM SPA** models are available in 45 colour shades of the sanitary, trend and the classic colour chart.

Radiators and softline panels:
RAL 7016 anthracite grey

Heating pipes open on one side and a purist, vertical softline screen combined with state-of-the-art centre-connection-radiator technology has made these extraordinarily easy to operate design classics the trend setters for every SPA environment. The **FATALA-VM SPA** model offers generous space for the drying and hanging out of textiles and towels.

FATALA-VM SPA.

MASTELLA DESIGN furniture

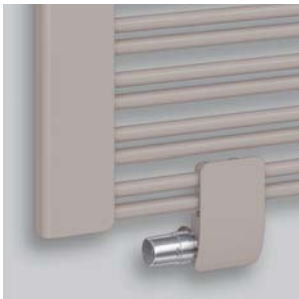

Your advantages: the unbeatable ease **FATALA-VM SPA** is an unbeatably unique laundry drying provision – trend setting design for heating with so many functional extras.

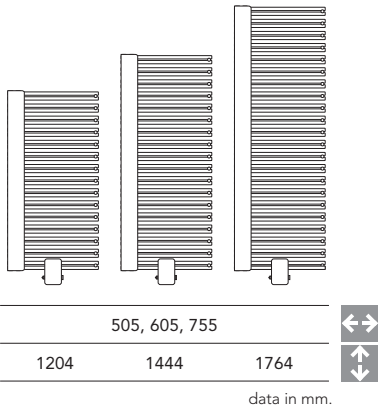

Radiators and softline panels:
S0088 Manhattan

The **VOGEL&NOOT** design radiator models here clearly show the direction developments are taking and that design can again quietly break through every barrier and boundary – including those of the way we think. These advances are doing away with rigid and outdated patterns of thought and action. Creating space for the new – and quite possibly for something never experienced before. The issue is the fusion of design radiators and furniture, recognising new ways forward and sounding out all limitations in the process, the result is the creation of true aesthetic added value for the future– because timeless design can be translated afresh in every epoch.

VIGOUR furniture

The **SEWA** model expresses pure elegance combined with youthful esprit. The smooth, high-gloss surface and purist straight lines of the towel rail result in a zestful appearance with a stylish rounding-off. A playground for the trend conscious art of living.

Your advantages: The broad towel rail emphasises the functionality of the design perfection. Up to three towel holders are available on request.

NERO.

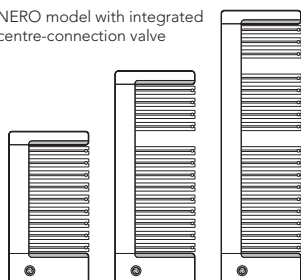

The **NERO** model is extraordinarily expressive thanks to its striking design, an effect that is reinforced by its comprehensively varied colouring and the profile edging frame open on one side. The chrome-plated profile edging frame adds weight to the independent design concept of this model.

Your advantages: The variable surfaces create harmony and provide living spaces with an atmosphere that is both comfortable and refined – including an unmistakable touch of luxury.

A choice of many exclusive decor variants is available!

MONDO & TEAM 7 furniture

The future of living is happening now: Accompany us on an exploration of contemporary living environments 2.0 – the combination of young trend colours and clear forms embodies the tendency to achieve a targeted reduction of essential elements. The simultaneous blending of functionality and design with ergonomic comfort plus durability. Fascinating models of timeless elegance.

UNIVERSAL & MODERN.

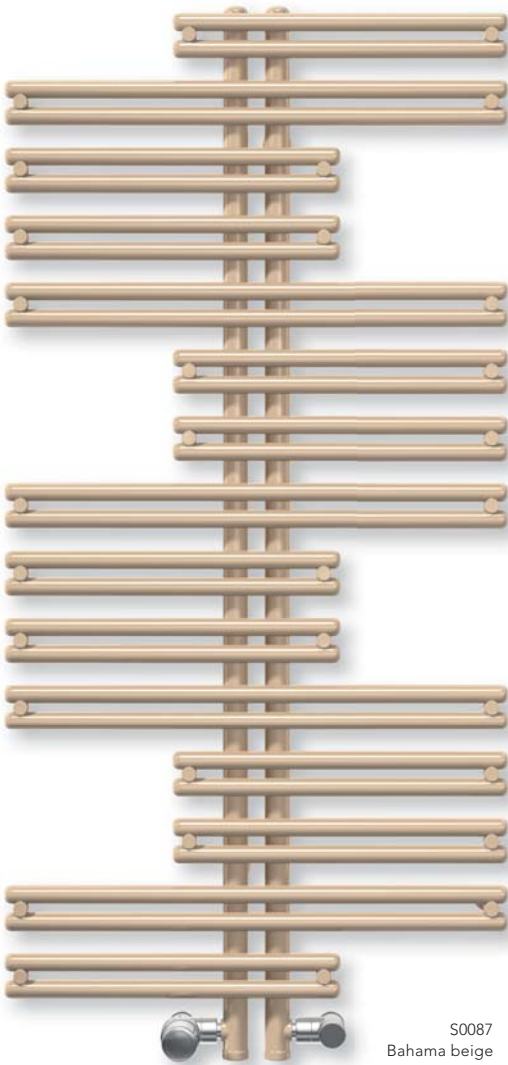

KASAI.

IDEA GROUP furniture

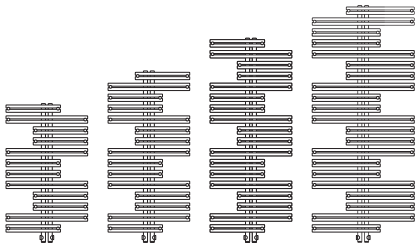

Your advantages: the unique heating pipe arrangement makes drying and hanging laundry child's play

The playful design with the heating pipes arranged on both sides has raised the **KASAI** model to cult object status with a powerful drive for recognition. The side variation for the pipes direction creates an interesting tension – that gives any living space that certain something.

VIGOUR furniture

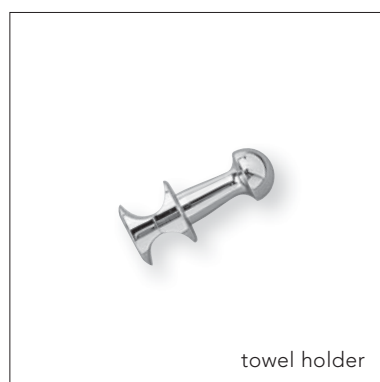

Your advantages: This design radiator is the highlight of any living room – a true eye catcher!

The fact that a radiator can make a wonderful sculpture is clearly demonstrated by this model, the **SEINE-V**. Surface finish in chrome and gold allow it to shine out as the focal point and centre of warmth in any room. Discreet elegance is also possible with the great range of RAL and bathroom colours.

ACCESSORIES.

VOGEL&NOOT design radiators are remarkable for the enormous range of practical accessories they have, combining functionality with functional design. All the accessories are easy to assemble – or to retrofit. This means that with a few simple turns of the hand you can have a great deal more storage space and space to hang your clothes. The chrome plated model can use most of the accessories for our design radiators.

EQUIPMENT.

PTC electric heating elements.

Our PTC electric heating elements are the ideal solution for transition seasons: They assure rapid provision of snug warmth. Depending on the radiator size a heat output of 300, 600 or 900 Watt is offered. All design radiators can be retrofitted with a PTC electrical heating element.

Temperature control for PTC electric heating elements.

If you operate your design radiator with a PTC electrical heating element, we offer a room thermostat giving you the possibility for optimal control of room temperatures.

Infrared regulator set.

Digital room thermostat with infrared transmission incl. PTC electrical heating element, for design radiator room temperature control. The infrared transmitter has a clear LCD display simultaneously showing the room temperature, the desired temperature, the operational type and the BOOST symbol.

SEINE-V and FULDA (up to BL 750 mm),

The **SEWA** and **NERO** models can be provided on request in variously decorated versions. These different decor variants can be seen on pages 18 and 19. The colours shown are not binding. Deviations in colouring are possible for technical reasons during printing. Additional personal wish colours available on request!

PRODUCT DESCRIPTION & SCOPE OF DELIVERY.

VOGEL&NOOT design radiators are top quality brand products, suitable for all application areas due to the broad choice of models and versions. Depending on the model the following versions are available for you:

Versions with classic connection delivery including blind and venting plug plus a wall fixture set in the relevant radiator colour.

Versions with centre-connection valve, delivery ready assembled with factory sealed blind and venting plug plus a wall fixture set in the relevant radiator colour. (Exception: The **OHIO** models are delivered with hanging brackets.) An integrated valve set for the **SEINE-V** model with a valve connection fitting plus cover rosette in the relevant radiator enclosed with the packaging for the models **BAWA-VM SPA**, **FATALA-VM SPA**, **BAWA-VM**, **BAWA-T-VM**, **LOWA-VM**, **FULDA-VM**, **CAVALLY-VM** and **OHIO VSM**, and also with an integrated connection fitting with a thermostat head for **SEWA** and **NERO**.

Room partition version

The **ARUN-T** model is used as a room partition. The individualised room partition provided by **ARUN-T** makes it an attractive design element for every living area. The delivery is made including blind and venting plug plus a wall and floor fixture set in the relevant radiator colour.

Version only for electrical operation

The electric radiators of the **BAWA-E**, **FULDA-E** and **FATALA-E** families are designed only for electrical heating without a connection to a central heating system. Self-regulating effect – the temperature dependent PTC electrical heating element controls the temperature heat carrier liquid in the radiator independently through changes in the electrical resistance – and it cannot be adjusted.

The delivery includes a wall fixture set in the relevant radiator colour.

Operating conditions

A maximum operating temperature of 110 °C is set for all models.

Fixture set

A wall fixture is located on the rear side of all the design radiators; this allows alignment of the radiator in either a horizontal or a vertical direction. (Exception: The **OHIO-VSM** model is supplied with hanging brackets.)

Surface treatment

Top quality, environmentally friendly double coated painting to DIN 55900, anodic electropainting in water-soluble undercoat; electrostatic powder coating, or electrolytic coating for finished surfaces. The minimum output for the chrome and gold plated versions of the **SEINE-V** and **FULDA** models is approx. 25 %.

Packaging

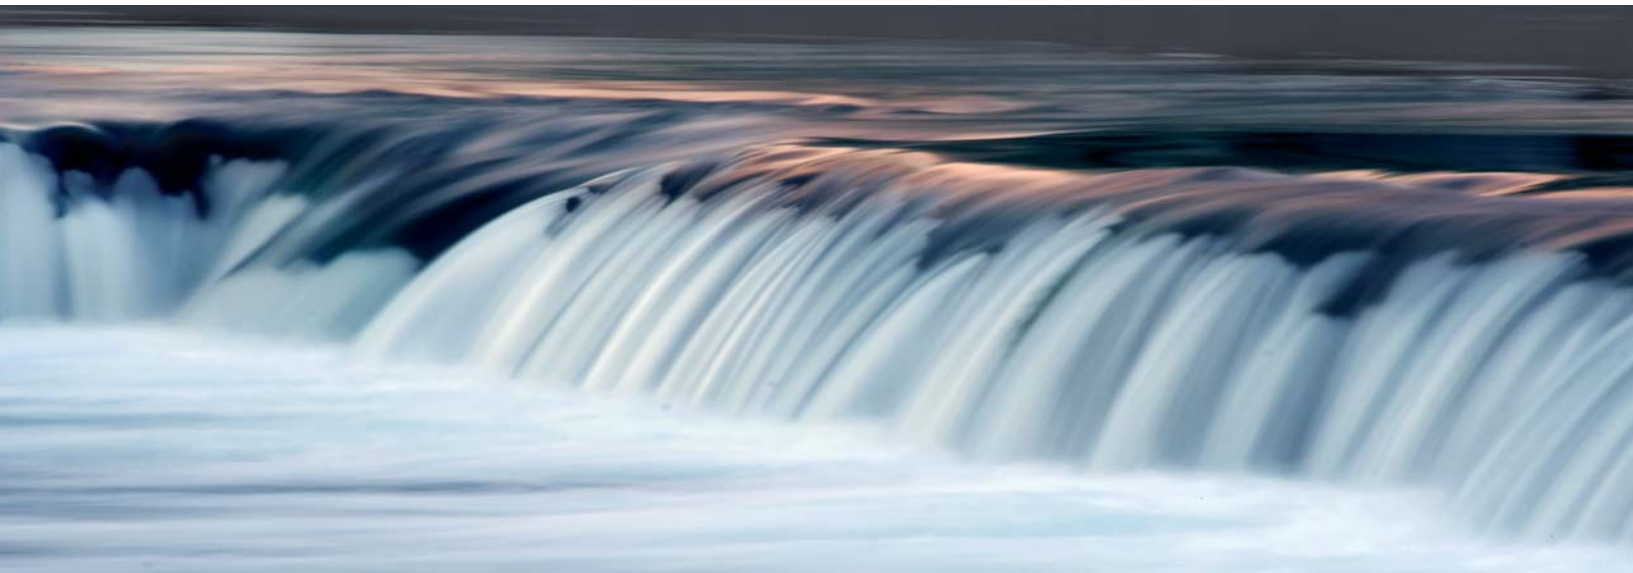

Layer protection, visible surfaces protection, double corrugated paperboard and PE film.

A strong brand name product of the highest quality and outstanding design competence and innovation. **VOGEL&NOOT** offers all customers strong brand products manufactured to the highest quality standards.

The production line and all manufacturing locations are ISO certified. The quality and performance data for the design radiators is tested by officially registered European test institutions. The challenges to us represented by these quality requirements give you the security of knowing that you are getting the best in heating performance and in product quality.

The **VOGEL&NOOT** guarantee conditions can be found in the Assembly Guide, which is included in the packaging for every design radiator.

heatingthrough**innovation.**

VOGEL&NOOT
